

# Elgin, Illinois

## New Issue Summary

**Sale Date:** December 9, 2019

**Series:** Series 2020A

**Purpose:** To currently refund a portion of the city's outstanding local government program revenue bonds, series 2013C (city of Elgin project)

**Security:** The bonds are payable from the GO unlimited tax pledge of Elgin (the city).

The city operates with strong revenue and expenditure frameworks and a moderate long-term liability burden. Fitch expects that the city will maintain a very high gap-closing ability throughout an economic cycle.

**Economic Resource Base:** Elgin is a home rule city, with a population of about 112,000, about 40 miles northwest of downtown Chicago. The city enjoys a relatively broad employment base that includes healthcare, professional services and retail sectors. Unemployment trends slightly above state and national averages.

## Key Rating Drivers

**Revenue Framework:** 'aaa': Fitch expects the city's revenue to increase above the rate of GDP growth, and the city has unlimited independent legal ability to raise revenue.

**Expenditure Framework:** 'aa': Expenditures are expected to increase at a rate in line with revenue growth, and the city has solid flexibility to adjust its main expenditure items.

**Long-Term Liability Burden:** 'aa': The city's long-term liability burden is moderate in relation to its resource base.

**Operating Performance:** 'aaa': The city has a very high level of gap-closing capacity, and Fitch expects it to manage through an economic cycle while retaining substantial financial flexibility. The city has maintained superior financial resilience through the recent economic recovery while increasing contributions to its two single-employer pension plans.

## Rating Sensitivities

**Efficient Financial Management:** The 'AAA' rating is sensitive to the maintenance of financial flexibility while navigating periods of economic downturn.

## Credit Profile

Approximately 80% of the city's assessed value (AV) is in Kane County and the remaining 20% is in Cook County. While AV declined by 29% from tax year 2009 through 2014, it rebounded by over 30% from 2014 through 2018. Tax year 2019 estimated AV figures from Kane County show an increase of over 9%, while the Cook County preliminary figures are not yet available.

## Revenue Framework

The city's revenue framework is very strong, with rapid revenue growth over the last 10 years and an unlimited legal ability to increase revenue through the city's home rule status. More than 33% of fiscal 2018 general fund revenues came from the city's property tax, approximately 23% from sales tax, and around 10% from the city's share of the state income tax. Around 9% of general fund revenue came from gaming and casino taxes collected in the Elgin riverboat fund, which is included in the general fund for reporting purposes.

Fitch expects revenue growth to continue to exceed the rate of GDP growth, driven by strong growth in AV and sales tax growth. Revenue from the sales tax and the share of the state income tax are expected to exceed budgeted levels. While revenue in the Elgin riverboat fund has declined significantly since its 2005 peak (\$28 million to around \$11 million in FY 2018), the riverboat fund was not included in the general fund until 2011 and is treated by management purely as a capital projects fund. However, revenue in that fund can be used for general operations.

The city is a home rule municipality and is not subject to the state's Limitation Law. The city has used this flexibility to implement new local option revenue sources, including increases in the past year to the home rule sales tax and the hotel/motel tax, a change in ambulance billing that will lead to an increase in revenue, and the implementation of a new local motor fuel tax. The city maintains unlimited legal flexibility to adjust tax rates and fees as necessary.

## Expenditure Framework

The majority of the city's general fund expenditures are for public safety, which accounted for around 67% of FY 2018 general fund spending. Highways and streets expenditures were approximately 12%.

Fitch expects that expenditures will increase in line with revenue growth. The main drivers of the city's expenditure increases come from mandated cost of living adjustments in union contracts (generally close to CPI) and funding for the police and fire pension funds. The city has three open collective bargaining contracts, two of which are being negotiated and one that is returning to mediation.

The city has solid flexibility over its main expenditure items. Carrying costs including debt service and pension costs are moderate at around 17% of fiscal 2018 governmental expenditures. The city may see increasing actuarially determined contributions to its police and fire pension funds as the city looks to achieve 100% funding by 2040 and begins to use annually updated mortality tables in the actuarial assumptions. While the required contributions rose by \$4 million in fiscal 2020, the city council approved advanced funding from general fund reserves in fiscal 2019 since fiscal 2018 actuals exceeded estimates by that amount. This will allow the city to keep the property tax levy level for the second consecutive year. Fitch's supplemental pension metric, which assumes a 20-year level payoff of the Fitch-adjusted liability, indicates that contributions are likely to continue to rise. For more information see Fitch Research on "Revised Pension Risk Measurements (Enhancing Pension Analysis in U.S. Public Finance Tax-Supported Rating Criteria)," dated May 31, 2017.

In fiscal 2017, the city spent \$12.4 million on capital projects out of the general fund using revenue from the Elgin riverboat fund. The city had planned to spend the rest of its riverboat fund reserves on capital projects in 2018, but delayed work on several street projects that will be spent in 2019 and 2020. The city plans to carry over \$15.3 million in reserves for capital projects into 2020 and draw that down for capital projects to \$2.9 million in 2021. Going forward, the city expects to have approximately \$10 million annually from riverboat revenue for capital expenditures on street improvements.

## Rating History (IDR)

Rating	Action	Outlook/	
		Watch	Date
AAA	Affirmed	Stable	11/22/19
AAA	Affirmed	Stable	10/08/10
AAA	Revised	Negative	4/30/10
AA+	Affirmed	Negative	4/13/10
AA+	Assigned	Stable	3/27/07

## Long-Term Liability Burden

The city's long-term liability burden is moderate, with net pension liabilities and overall debt at approximately 13% of city personal income. Overall debt comprises 44% of the total liability and the Fitch adjusted net pension liability comprises 56%. Management reports that it does not have current plans to issue new tax supported debt. With revenue from the riverboat fund covering most street improvement projects, the city's 5-year capital improvement plan forecasts issuing around \$10 million per year in new tax supported debt to support utility projects that are expected to be paid by utility fees.

The city participates in four defined benefit pension plans: the agent multiple-employer Illinois Municipal Retirement Fund (IMRF); the agent multiple-employer Sheriff's Law Enforcement Personnel Fund (SLEP); the single-employer Police Pension Plan (PPP); and the single-employer Firefighters' Pension Plan (FPP). The IMRF and SLEP are statutorily funded at the actuarially determined contribution amount and the PPP and FPP are funded at an actuarially determined amount that would be sufficient to bring the plans to 100% funded status by 2040. Fitch estimates the aggregate ratio of assets to liabilities at 55%, assuming a 6% discount rate. The state has discussed plans to consolidate most of the state's public safety pension funds; while consolidation could generate some economies of scale, Fitch does not expect this would materially affect the city's long-term liability burden.

## Operating Performance

The city built and maintained high reserve levels through the economic recovery, despite the planned use of general fund balance over the last two fiscal years. The city's low level of revenue volatility and superior inherent budget flexibility, combined with very high levels of reserves, enable the city to maintain financial flexibility well above the 'aaa' reserve safety margin threshold in a typical recessionary decline stress scenario. This stress analysis incorporates reserves in the riverboat fund, which is legally available to be used for operations although the city has a practice of using the fund solely for capital projects.

The city has demonstrated strong budget management through the recent economic recovery. Management built reserves through fiscal 2012 to a high 65% of general fund expenditures before slowly spending some of those reserves down over the subsequent five fiscal years. The city added to reserves in fiscal 2018, with available fund balance increasing to over \$73 million (60% of general fund expenditures). Management had planned on a small draw on fund balance of under \$1 million. However, due to sales and income tax revenue exceeding budgeted levels and a delay in some pay-as-you-go capital projects, the city expects reserves to increase by \$1.4 million. That projection includes the \$4 million that was advance funded for public safety pensions.

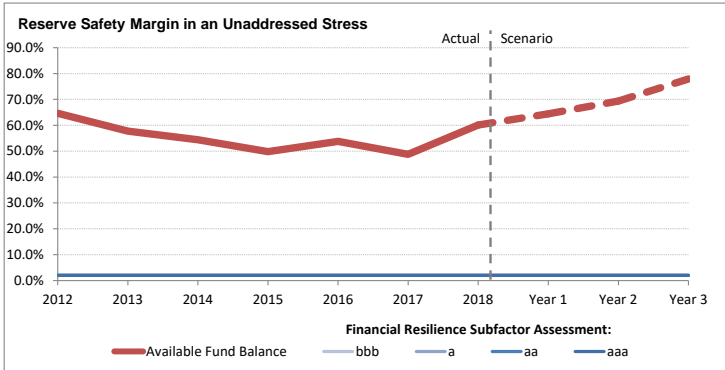

## ESG Considerations

Unless otherwise disclosed in this section, the highest level of ESG credit relevance is a score of '3' - ESG issues are credit neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity.

Reserve Safety Margin (a)	8.0%		4.0%		2.5%		2.0%	2.0%		
Reserve Safety Margin (bbb)	3.0%		2.0%		2.0%		2.0%	2.0%		

Notes: Scenario analysis represents an unaddressed stress on issuer finances. Fitch's downturn scenario assumes a -1.0% GDP decline in the first year, followed by 0.5% and 2.0% GDP growth in Years 2 and 3, respectively. Expenditures are assumed to grow at a 2.0% rate of inflation. Inherent budget flexibility is the analyst's assessment of the issuer's ability to deal with fiscal stress through tax and spending policy choices, and determines the multiples used to calculate the reserve safety margin. For further details, please see Fitch's US Tax-Supported Rating Criteria.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.
